FRANDRETH'S PILLS.

BE NI TH'S PILE CLEANER THE BUWELS, but y beaut. THE REPORT THE NATURAL MEDICINE OF MAN.

. Use 6 for Sily years by recome now living in the United States whose vigorous age surprises the beholder. Old chronic complaints, inflaminations, recent infections or otherwise, and every kind of disease are cured by these Beauty Restorers.

We who are in search of bealth give heed

FACTS FOR CONSIDERATION.

Brandreth's Pills have been before the world for nearly see beddered and ten years. They have an established heracter for safety and estimate, which purces them in the first rank of all the medicines of the day. They are query vagatatic, harmiers to the tenderces age of weatest frame, yet of sufficient efficiely to thoroughly elemnes and purify the blood, through the organs of the stemach and howels. They had and improve digestion, and sound, refreshing sleep follows their ins. They have cared thousands of cases of the mest distressing dyspepared thousands of cases of the mest distressing dyspepared thousands of cases of the mest distressing his seat the research by their use, and health has again blessed the contraction of the case of the case of the research of the case of the c sale. All the symptoms of contrins of contemption have been removed by their use, and health has again blessed the street emoved by their use, and health has again blessed the street emoved by their productive of decision, a malifiely cured by these mile. Apoplexy and purely state as some prevented if the pills are purely and purely state as some prevented if the pills are purely and purely state as contained to health of these who have been structed by apolexy or paralysis they are the only reliable medicine. In all allocations of the longs, chest and bowes their prompt use saves life and quickly cures. Phenomenia, pieuristy, choiera, wind, spanns, woram, choice a morbor diar them, dysentery, whether from mahrin, enting surpe fruite or other faults in diet, yield to their indicates the state bowes their prompt or other faults in diet, yield to their indicate, and there are no the special covers; whether again a resolution, the maintains, liver affections, ruptures, inflammations of any organ, fevers, whether again or other special covers; billions diseases, jaundice, St. Vitus' dance, smallpox, measles, croup, crystpelas, white swellings, piles, thoers, of even thirty years continuance and especially uncressful. (Vide charge of life, both first and second periods.) Epilepsy, depression of spirite frightful dreams, all costructions and relaxations are by them cared dispersed and corrected. And how are these apparantly complex and different discusses cured by one and the same medicine?

RECAUSE BRANDRETH'S VEGETABLE UNIVERSAL me we as obstruction from the stomach, bowels and the reme we all obstruction from the stomach, bowels and the inculation and so purify the blood. Discuse begins with pair, duriness, faintness, towness of spirits, sleepless ness or a peculiar feeling of fatigue and uncasiness, the warning of the approach of fever. These symptoms are always produced by some obstruction in the stomach, in the bewels, or in the circulation of the blood from external or internal causes. Long experience has confirmed the fact that Brandreth's Pills, persevered in according to the requirements of nature, remove the difficulties and extere health. Long and careful observation of numerous ages rosulted in the discovery that an obstruction is the stomach, in the bowels (costiveness), or the circulation, impority of the blood, in fact, is the occasion of if the different forms of disease to which the human leady is subject. body is subject.

This theory of the unity of disease gave the idea of a unity in medicine. If a single medicine could be made sha, would be applicable in all cases, it was evidently a thing to be desired. It would be applicable to the benderest age, to the weakest frame; must be of a kind so be used daily when required, without possibly doing other than good to the stomach and bowels. In fact, a weed-like proper to be used by one sick, until his health was restored.

NATURE'S ASSISTANT HER OWN REMEDY Solt a remedy the discoverer of Brandreth's Pills scaput and found after a search of over thirty years' duration. And now the proof is on every side that persectiones with these celebrated Pills cures all the various apseurances of disease, but which, in reality, are only more or less pairful and stubborn, according to the greater or sever impurity of the blood.

ELOOD AND AIR.

Fixed gives the substance, the form, the material of our todies, but air gives them life and vivacity. Unless the air can effectually come in contact with all the blood at stated intervals, energy and robust heaths will be wanting, and pain in some part will be present. Three or five of frandreth's pills, taken at once, will restore the circulation, the air and the blood will soon be in harmonious contact, the pain removed and spirits revived. But ye dectors and druggists and experimenters, beware! Try act to enforce this great principle, "nature's method of care," by other than vegetable pargatives. Mercury, antimory, areano, iron, sulphur, are all dangerous, and whilst they are utterly incapable of purifying the blood, they invariably injure the stomach or brain. No permanent health can be obtained without vegetable purgation.

SERCURY. BRON, ARSENIC, ANTIMONY, IODINE, STIPBUR—Used as medicine, causes the bones to easily break and the tendous to snap like glass upon great exertion.

Chiemel, blue pills, and all preparations of mercury, iedine, suiphur, iron, antimony, and all mineral remedies whatever. In addition to other well known injurious effects, reduce the proportion of gluten in the bones below the standard of health. Now, the gluten is the substance which gives to the bones strength and toughness, and to the tendons and muscles, frameess and elasticity. Now, whatever takes out these qualities, caoses the bones to become brittle like glass, when they casily break, and the muscles to be soft and flacid, and unable to endure fairing. The boart, which is a muscle, suffers in peopartion to its size, and a languid circulation is only one of the results. Again, one main is thrown out of his wagon, and has both his legs broken, another is thrown twice as far and is only bruised. The first laid used in sickness, blue pull, calonel lottine, from, or some other nineral preparation, whilst the latter had only used Brandreth's pills, which are vegetable, and cause the bones to be hard and elastic the fieth firm, the hair abundant and glovy, and even the nails to be rosy with health. the nails to be rosy with health.
c no minerals when you are sink, for you never can when they have done murting you.

THE EFFECT OF BRANDREITH'S VESETABLE UNIVER SAL PILOS SAL FILES is introduced in a very few minutes they case year, when used in colic, is spaced, in pleuristy, in indiammation of the bowels and in other inflammations. They appear to have an especial effect on and around parts in pain or diseased, and, what is more, they have action mation of the bowels and in other infarmations. They appear to have an especial effect on and around parts in rean or divessed, and, what is more, they have action only upon effete matters and it is thus that they take from the blood its impurities, and it is thus that they take from the blood its impurities, and it is thus they subdue and carry out of the body infarmations; it is thus they discuss tumors; it is thus they remove swellings and enterprise to the gainds, ligament, bones, vens, arteries, and restore the health and the natural form of the part, for, remember, good blood makes perfect in form all parts of the body—perfect head, perfect hands, perfect feet, perfect bair and perfect male, and the perfection of all the body makes good blood. Perfection of the continuous perfect formed body. Each depends upon the other. Head is not made only in the liver, in the stomach or the heart; it is made by the combined action of every organ, of every tissue—the bead, with its master organ, the brain, is in no wise superior to the feot in the particular. Every part and portion of the body supply and make blood, and it is the perfection in form and localith of all the organs that produce good blood, and good blood annet do otherwise than return the benefit by building up perfect organ—perfect head, brain and body is the consequence. Thus good produces good Good blood. These are facts not disperted by doctors or issued and anywhere. What we have to do it to purify the blood. Brandreth's Pills insure this, and so insure a perfect body. Their use is end disperted by doctors or issued and anywhere. What we have to do it to purify the blood. Brandreth's Pills insure this, and so insure a perfect body. Their use is equally applicable to the chronically diseased, whether rheumalism or otherwise, as to the reconstance of sickness, and perservance we are to care where the powers of nature are not entired by sure to care where the powers of nature are not entired by sure they do not leave the patient the shadow of his former

PUBLIC MEDICINE IN NEW YORK FOR TWENTY-FIVE

FUBLIC MEDICINE IN NEW YORK FOR TWENTY-FIVE YEARS.

It is now twenty five years since Brandreth's Pills ware introduced by me into the United States. Since that time, also, our tables of mortality show that the average of life has been gradually on the increase. And that now, not withstanding nearly all our large cities have more defective dwellings, more cellar residences, less sewerage and dramage, and more filtry streets than the cities of England—the most healthy country in Europe—yet whilst he entit of mortality in England is 2 in 1,000, that of the United States is only 15 in 1,000—the animal deaths being only one and one-half per cent of the population. These recipits I unhesitatingly sacribe to the almost universal diffusion of Brandreth's Pills, and perhaps come other medicines of kindred quality; medicines 25-bit and to remove disease by parting the blood, as the Quintessence of Sarsaparilla, and its concretion in the Life Addition Pills.

Statistics, or the numerical method, prove this beyond cavil or doubt.

To establish these facts in the mind it is only necessary that Brandreth's Pills chall have poblicly a full and imparisal trail. Will those of the "regular practice" who have the power—Physicians, Fresidents and Derectors, or Sate Legislutures—assign a ward in a public or private hospital, where the purgative plan of treatment can be fully and fairly tested under my direction, or one of my deciples, in cases taken indiscriminately or by lot from the various wards? I now unhesitatingly assort, prophenying of the fature from the past, that the recovery by the purgative as compared with the regular practice will in that one be as one hundred to one.

The sencess of the purgative plan of treatment can be fully and fairly tested under my direction, or one of my discountered to one.

The sences of the paragrave plan in all the forms of the only not discount parts, yet it is still impurity of the impurity and the nature of the particular organ where it developes theal? I am satisfied that the mothes do

CHETIFICATE OF TWENTY-EIGHT YEARS USE.

Newcastis, Wastenesten Corsec, N. Y., August 11, 1800.

Fr. P. Praymentiff—
My Ivan St.—I am now seventy nine years oil, and
her the bast twenty eight years have been a constant neer
of your Vegetable Universal Pills when sick, fully
realizing the advantage of enforcing purgation with a
medicine, which, while harmless in its nature, removes
all impurities. I can safely say that the vigorous oid age
now enjoy has been caused mainly by the timely use of
Erandroib wills. I have had in these last twenty eight
years several tie of sickness, and cocasionally some in-

firmity of age would press upon me. At these times I have siways found your pills a sure remedy, giving me not only health but strength. I consider them, therefore, not only invaluable as a purgative, but also as a tonic, qualities possessed by no other medicine known to me. I have never during these lest twenty-eight years used any other medicine whatever, being convinsed, by experience, that none was as good. Brandreth's Pills have also been freely used by my neighbors in every kind of sickness, and have been never known to fail when wromptly administered.

Under these circumstances I doem it my data above than a quarter of a continuous

promptly administered.

Under these argumentances I deem it my daty, after more than a quarter of a century's experience of their accidings; to been public testimony to the innocence and officacy of Irandre h's Pitts, and I do hereby recommend them as the best and only medicine necessary for man. Yours truly,

NATHANIEL HYAIF,

Juntice of the Peace for forty years in Westchester county, N. Y.

THE ENPERIENCE OF A QUARTER OF A CENTURY, 515 ENERGY ATRACE, New York July 14, 1880. Dr. B. BLANDISTIN—DEAR Six—It is about twenty-five years since I first communicated to you the benefit which I derived from a free and continuous use of your pills. I stated at that time that I had for several years provious been affected with liver complaint, dyspepsis, bilious colic and obvanic constipation, all of which were in active operation, and threatened my speedy dissolution, the entire failure of the various medicines recommended at that time, and the impotency of some of the best physicians of this city to afford me relief. When I first commenced taking your pills, I took six, adding one pill every day up to fourteen; then restucing one every day down to six, and so co, continued for at least four months when I not only found myself well, but increased in weight over thirty pounds, and, as I conserved, partly made over again. When I have been taken with sever or exercolating pain, I have taken as high as thirty-throe pills at a time, always with speedy relief and permanent results. From the year 1855 until the present time (1860), I have continued the use of your valuable pills whenever occasion required.

ways with speedy relief and permanent reasons the year 1835 until the present time (1860), I have continued the use of your valuable pills whenever counsion required.

Wherever I have travelled in this State, also East and South I have recommended a liberal use of your pills to hundreds of persons in various stages of different diseases, and in every instance where the patient persevered in a liberal use of the pills he was cured. Now, after twenty-five years of experience and observation, I feel justified in asserting that your pills, for special use, perfect safety, and positive success, are the best and most reliable of any purgative medicine I know. In fact, the fundamental principle upon which your medicine is founded is both apparent and conclusive. The law of purgation in order to effect purification, physical, intellectual or spiritual, is no new doctrine. The whole vegetable family, the air and sens, have presented this truth to man for observation and adaptation in all ages of the world. It needs no argument or flustration, as the demonstration is open to all who choose to observe it; but there must be the proper agent applied to produce the result. Is the air we find electricity and storm; in the ocean, the upheaving from its deep see bed into universal agitation; in the vegetable world, the air, light and asser; the unrighteous man is told to "purge out, therefore, the old leaven, that he may be a new lump." And what is furthermore a remarkable truth—'almost all things are by the law purged with blood "—Heb. ix., 22 Genesis, ix., 6, we are prohibited from shedding the blood of man; the reason given, "for in the image of God made he man." The deepest punishment for shedding man's blood was death. The blood is put for the life, and life for the blood.—Lev. xvii., 14. The whole Mosaic ritual abound of with the figurative means of purging away sin, which was the blood of bulls, goats, heiters, &c. But these never had the effect of purging away sin, only in a figurative sense.—Heb. x., 4. Frum those and

Br. B. BRANDERFE.—

DEAN SIM-FOR three years I was afflicted with crysipelas, so that i was almost crazy with the pain and unable to do anything whatever. You can imagine my condition when I say that I had sixty-two running sores at one time. Being tired of feeling the doctors and taking their drugs, I happily called at your office and saked your advice. Fifteen boxes of your Vegetable Universal Fills and eight boxes of your Sive, used as you directed, made me a sound and healthy man in less than three months. Yours truly,

CERTIFICATE OF FIFTEEN YEARS USE OF BRAN. DRETH'S FILLS.

MOENT RIFCO, Westchester Co., N. Y.

DE. BRANDEFE —

My DRAN SIN-I do not know you personally, still I have been your warm friend for the last fifteen years, because of the great good Brandreth's Fills have done me. I am a woman somewhat advanced in life, and have suffered much at times with discusses incidental te females. Brandreth's Pills have done me. I am a woman somewhat advanced in life, and have suffered much at times with discusses incidental te females. Brandreth's Pills have always effected a speedy cure, and my faith in them is great. I always give them to my friends when fick, and never knew them to fail. As a family medicine they are the best I have ever used. There need be no sick children or sick women, if when pain or sick ness begins one or two doses of Brandreth's Pills are faken. When in great pain I have taken as high as differen pills at a dose. They always releve me at once without causing weakness. No family should ever be without then in the house, and overy sick person should use them at once. Yours, &c., Mantietta Washiurn.

Sing Sing, Westchester Co., N. Y., Aug. 24, 1869.

By R. Branders —

Dear Suc.—Some years singe a bad swelling appeared on my knee, and several physicians attended me. I kept growing worse and worse, until I was contined to my bad a helpless cripple. Large quantities of matter kept coming from my log, from its deep holes, together with pleces of bone. I lay in bed over one year, when the do fore came to me and said I had a very bad white swelling, and that the leg most be cut off or I would die. They wanted to cut it of then, and had brought all their instruments. I mid "No. I would die first." So they left me. Despairing of core, I took your pills. I began with four a day, and took them every day for a month, when my knee appeared a little better. This encouraged me, and though still in bed I continued taking your pills for four months more, I was now able to get up and go about a little with a crutch. I used the pills for three months more, when the sores all healed, all pain ceased, and I was well. I threw away my crutch, and now for the nest four years I have been a well and healthy man, my leg being strong, and my body cound. Words fall to express my gratifude to you. Yours truly.

Westchester County, Bs.—Richard T. Bakkir.

DR. B. BRANDRETH'—

DRAW SING, August 24, 1860.

DR. B. BRANDRETH'—

DRAW SING, We have sold Brandreth's Pills for the last seven years. Our average sales per year amount to seven greas of boxes. As a family medicine they give great sat shetion, and no pill is as much used here as Brandreth's Pills. There is but one other remedy that appears equally liked, and that is Allcock's Porous Flatters. Of those we sell seven or eight gross a year.

Sald at 294 Canal street and No. 4 Union square, New York, at 25c, a box, with directions in all languages, and by one agent in every town throughout the world; and by 500,500 druggists besides, who purchase them and sell them as an article of commerce.

One dollar enclosed to Dr. Brandreth, Brandreth House, New York city, will, insure one handred and twenty Brandreth Pills and valuable documents, by post, without further charge, to any part of the United States.

importance of the BLOOD.

The common sense of mankind is in favor of the vital importance of the bloot. Although the effect of its loss may never have been witnessed, there is not a loss has a lastinctive feeling of bodily danger resulting therefrom. This natural dread is felt alike by the youngest child and the most robust adult. Moses repeatedly asserts that the life of the fless is in the blood. The Greek and Romau philosophers and poets regarded the fluids of the body, and especially the blood, as the immediate seat of the vital principle. Hippocrates, folion and Articless adopted this opinion in their writings. Harrey describes the blood as the first thing living, and the last thing dying in levery animal. Re advocated this view very strongly. In fact, he evidently cuteriained the opinion that the blood readly built up the body that the power of vitality inherent in it was the cause of the body's particular form—in other words, that the blood of man could do not have than make a human being that there subsists between the IMPORTANCE OF THE BLOOD. real in it was the cause of the body's particular form—in other wards, that the blood of man could do no other than make a human being: that there subsides between the blood and the organization have a reciprocal vital action, in which the blood has as large a chare as the organ, that the actions of the blood cannot be accounted for, or comprehended, from chemical and physical laws—therefore the blood must be regarded as living. The universal instinct and judgment of mankind are in favor of this outside.

BLOOD A LIVING FLUID.

I consider it a settled question that the blood is endessed with vitality. There are some living animals which only contain a few grains of solid matter to twenty set thirty ounces of fluid. Nearly all organized solids yield, on chemical analysis, four filths of their weight of water. The reproductive materials as much fluid are only relative terms. If we direct our attention to the extreme capillaries, and beyond them, we must arrive at a point where the blood must be regarded as extravasated, and so divided and mingled with the materials of a tissue that no positive line of demarcation can be conscired between the purities of the fluid blood and those of the solid. The blood has the same corpuscular structure during the life of the body, and furnishes the same chemical constituents after death as the solids.

The life of every part of the body depends on the blood and sithough it has been objected that this only proves it to be necessary to animal life, and that food and air, to which we do not attribute life, are equally necessary, it may be replied that life will continue a long time without food, whereas, without blood, it ceases instantly. There are many events in the animal economy which are best accounted for on the principle of the blood is ritality. The sudden deaths which result from lighting—blows on the stomach—and the action of various poisons are of this character. No lesse of the nervous gystem, or of any organ, is left to tell the tale; but the blood invariably relative to the kind the blood wit all run cot, for it cannot contain the cannot contains a long time. Cannot contain the cannot contain the

the resent of the blood being suddenly deprived of its vital principle.

the resc. of the blood being suddenly deprived of its vital principle.

FOOD AND MEDICINE CAPABLE OF DIRECTLY ENRICHING THE BLOOD.

M. Denis, a French physician, quoted by LeCana, showing the remarkable effect of diet upon the proportion of the red corpuscles of the blood. A young girl in perfect health was bled, 1,060 parts of blood formished 132.3 of solid material from the corpuscle. She was submitted to rigorous abstituence for fifteen days. Again she was bled and the blood again examined. It now furnished only 87.9 parts of solid corpuscular matter in 1,000 parts. The blood of a woman thirty-nine years of age, in perfect health, furnished 164 parts; but after eight days of severe abstinence, only 110 in 1,000 parts. The clear inference from all this is, that diet has a most decided, and in all probability, a direct effect upon the preportion of the more solid to the more solid to the hore inquid part of the blood; or, otherwise expressed, in the number of the organic blood corpuscles floating in the living fluid. From actual experiment, also, no room is left for doubting that in various diseases of the general system changes take place in the proportional as well as in the actual number in the system. M. LeCana found that they were greatly diminished in females subject to copious menstrual fluxes. He found they were also greatly diminished in preportion by loss of blood, and this is confirmed by the experiments of MM. Prevost and Dumas. The blood of a young man, at the first bleeding, afforded 139.129 parts of solid corpuscular matter; at the third bleeding only 76.19 were obtained. This great fact should be impressed upon our minds, that individuals whom we see around us differ from each other in the constitution of the blood in numerous degrees. Some have more than double the life in them that others possess, and one man or woman, in the same space of time, consequently is capable of suffering twice as much, and thank tod, of enjoying twice as much. portion, in the ratio from 64 to 155 in 1,000 parts, consistently with health, and little or no doubt can remain that there may be more than twice as many red corpuscies in the blood of one person, as compared with another, apart from any influence resulting from the disease. The physiological importance of the vital blood corpuscie must make evident the value of this fact, which has great importance in connection with the curative astion of the Brandreth Pill, which will be further illustrated.

has great importance in connection with the outside alterated.

NECESSARY TO HAVE HEALTHY BLOOD IF WE WOULD HAVE HEALTHY ORGANS.

NECESSARY TO HAVE HEALTHY ORGANS OR WE CAN HAVE NO HEALTHY BLOOD.

The elements of the blood are derived from the food we cat and the air we breathe. It is perfected by the combined action of every nerve, and of every set of vessels in the bedy; of every viscus and every texture. The blood only that has circulated through all the organs of the body is fit to maintain the circulation and to support life. Should any of the secretions be suspended the whole mass of blood seoner or later will become impure. So, to keep the blood in a condition of purity, good urine, good bile, good saliva are as necessary as chyle. The imperfect action of any one organ, or the deterforation of any texture, would soon spoil all the circulating blood. It is thus in fixed organic disease, hence the increased sallowness, the absence of the healthy that in those affected in this way. The great assimilating structures of the langs and stomach may continue sound, their functions complete, and yet, if any one of the minor organs is diseased, the blood is sure to constantly gather impurity from that source, and it is only by the use of vegetable purgatives, such as the Brandreth Pill, that the danger can be remedied. Every organ, every set of vessels in the human body have a double duty to perform; the maintenance of structure and the production of blood. We know that this fluid, though replenished frem the stomach through the lacteals and other absorbent vessels, is not completed in them—for there it is chyle or lymph; it is not blood. When, then, is blood made? In no particular organ, but all over the body, for in all it is modified and altered. For, even admitting that it is fabricated in any particular organ, as in the liver or spleen, yet its perfection must depend upon the perfection of the functions of all the other organs. The common idea is, that all the organs and tissues of the body are necessarily eng

By the following plate, descriptive of the organic elements imparted to the blood from the use of BRANDRETH'S PILLS,

which elements are incorporated into the circulation, and become incorporated with the blood, forming a portion of our life, the use of these Pilis ADD TO OUR VITALITY!

thus enabling us to resist the
ACTION OF DISEASE,
ACTION OF DISEASE,
The second of the REALTH.
Chemists may verify these facts by an examination of the
Brandreth Pills; but it is their effect as a curative of
which the sick desire to be informed. The way in which
a cure is effected may be interesting to professional men,
yet it is not of any sort of consequence to a man or
woman in search of nealth.

HINT WANT TO KNOW

THEY WANT TO KNOW WHAT MEDICINE CURES. Not now if Class.

Nevertheless, as the proportion of the corposeles

HUMAN BLOOD CORPUSCLES,

serve as a measure of the life and energy of the body, it may be as well to knowlethat reduces and what increases their number in the human system.

HOW THE VITALITY OF THE BLOOD IS WEAKENED HOW THE VITALITY OF THE BLOOD IS WEAKENGD.

Uterine and other hemorrhages produce in a marked manner this effect, which may probably be explained upon the principle that in proportion as blood is lost, watery fluid is received by that which remains.

The use of mercury, preparations of antimony, arrenic, iedine and iron, all these minerals tend more or less to destroy the vitality of the blood. Iron is necessary and is an important ingredient of the blood, but it MUST BE DERIVED FROM THE FOOD, and Brandreth's Pills give the necessary

STRENGIH TO THE ORGANS OF DIGESTION to abstract from the ordinary food all the from required for the

SUSTAINMENT OF HEATH

SUSTAINMENT OF HEATH ERADICATION OF DISEASE, besides, they reduce the proportion of WATER IN THE BLOOD.

besides, they reduce the proportion of WATER IN THE HOOD.

Bleeding is used to promote absorption in drapsical effusions. Even if successful the health is ever after feeble, while.

JUDICIOUS VESTIABLE PURCATION is capable of doing all the good bleeding effects, without the evil consequences to the constitution always experienced when bleeding is employed.

Bleeding removes the best portion of the bleed along with the worst, while the effect of purging with Brandreth's Pills takes the worst, and only the worst, leaving the best to fortify and restore the system to all the health and rigor it is capable of attaining.

The expressions, rich bloed and poor blood, have, therefore, a real as well as a scientific basis. They have also an inetimable practical importance, and the ridicale which many physicians have attempted to cast upon those who adopt these common sense opinions must recoil upon themselves, as inevitably as that truth must ultimately prevail over error.

BLEEDING—WHY OPPOSED TO ID

We are opposed to bleeding, we about leaches. Had it been required that a human body should part with its blood for the cure or prevention of disease, our beneficant and all wise Creator would have arranged a place for its expedience—a natural votice. In it just or reasonable to suppose that this Divine and gracious Providence, who, like a kind and indugent mother, produces and conserves all things for our use, would have failed to provide a safety valve as it were to let out our blood, could it have accumulated in too great abundance. The fact is, there being no such outlet is proof sufficient that there never can be too much of the visit fluid. For its the life—it is the "life of the firsh." How is it in the vegetable work? De trees have supplied to them from ever revich roil, too great a quantity of sap! No! The growth may be too vigorous, true—then remore the peorest parts. Do the same with the human body: whon oppressed and heavy, take a few doses of BEANDRICH'S VEGETABLE UNIVERSAL PILLS; they will take away what is UNELESS OR UNSOUND, and touch nothing that will bear fruit.

PREVENTION OF DISEASE.

PREVENTION OF DISEASE.
The mande of valuable lives might be saved if people would attend to the first symptoms of disease.

would attend to the first symptoms of disease

THINK FOR YOURSELF.

While no man wishes another to thing for him on the subject of politics or religion, his own thit and health he neglects, until he is obliged to put himself in the hands of others to be dealt with according to their judgment.

HOW TO OBSERVE AND WHAT TO DO.

Upon the first appearance of disease you may know that some natural outlet is obstructed and if upon first feeling inwell a dose of Brandroth's pills are taken, the cause will be removed. Persons allow themselves to live on for years with an affection of the liver, ac, not feeling entirely sick, nor by any means well. No man can properly attend to his business in this condition, for he has not the command of the powers within his heat.

Extensive, Christyles are Rescharted and the great space of disease. The quantity of all the great space of disease. The quantity of all these lates the large, at an

BRANDRETH'S PILLS.

erdinary aspiration is forty cable inches. All the blood in the body passes through the heart every five hears, and the quantity that is thrown to the heart at one pulsation is about two cunbes, and this in less than a second of time. If, then, we intale impure air, how can we be well. The actual particles of impure air, if breathed, are faken into the longs to be mixed with the blood. Imagine the quantity of disease that is taken into the system by impure air. If we go into a crowded room, and the air is impregnated with foul matter, it arises from the impurities, carbon, &c., thrown from the lungs of others, from the skin, and from the clothing of the crowd. This thought should deter one from wishing to inhale impure air. Much disease may also be taken through the skin; therefore bathe and keep the skin free from its own impurities and from the contagion of others. By exercise we strengthen all the system, and have the greatest opportunity for inhaling pure air.

By the observance of these rules, and by purging in case of an obstruction of the outlets of the system, setting these myriad of avenues to cleansing the system, violent disease and premature death would be prevented. Hence we see the importance of ERANDECETS PILLS, which, immediately they are taken into the stomach, begin to divide the

which, immediately they are the state of the blood, whether derived from impure air or food, are by them separated from the good, and driven out or the system by the bowels, by the kidneys, or the skin.

and driven out of the system by the bowels, by the kidneys, or the skin.

ENTRACT FROM AN UNPUBLISHED WORK ON PARAGUAY.

One day I went hunting with an Indian chief and four followers, some ten miles above Asuncion, Paraguay. We did not find much game at first, and I noticed that the chief kept his eyes on the ground, as if he was looking for something. At last he picked up a number of black particles about as large as bullets. He informed me, in answer to my inquiries, that they were the excrement of the capitana, or river hog, and used by all the Indian tribes to purge with when sick, and highly valued, because one or two purged freely. I asked why, when sick, Indians wanted to purge themselves. He replied, 'if see the horse, buffalo, deer and all kinds of animals eat sail earth to purge themselves. I see the dog eats grass for that purpose, and the cat different kinds of herbs; and if they are confined and cannot get them they run mad or die. I see birds eat sand and small stones to purge themselves, and, therefore, I think purging is good for man, and without it, when he is sick, he would die." This conversation led me to tell him about Brandreth's Pills. I gave him six boxes to experiment with on himself and others, and in a short time their fame spread among the tribes, and hundreds brought their sick for me to cure.

FEVERS—How PRODUCED.

FEVERS-HOW PRODUCED. Fevers are produced by morbid foreign matters, either gaseous or solid, which, being carried into the circulation and applied to the surface of the blood vessels, cause an increased action of the heart and arteries, which action is called fever. These morbid matters obtain their way into the circulation,

nto the circuments, By inhalation; From unhealthy, or undigested aliment in the bowels,

Through the vessels of the skin. OTHER DISEASES ACCOUNTED FOR.

OTHER DISEASES ACCOUNTED FOR.

A rheumatism in the foot, and a pain in the head, a colic or an asthma, are produced by the same cause, irritating humors; and the reason why in one case it is a spasmodic affection of the bronchial vessels, and in the other a spasmodic affection of the muscles of the foot, of the heavy headache, or the torture of the bowels, is merely dependent upon what part of the intestinal canal or other organ, the morbid or acrimonious humor has settled. If the nerves of that part of the intestinal canal communicate with the head, the head is affected, if with the foot, the foot; if with the bronchial vessels, asthma is the result; if with the nerves communicating with the bowels, then they are drawn in heaps.

NATURE'S OUTLETS.

For the expaision of all disease nature has her myriads of avenues, and any other method for the removal of disease, excepting through these avenues, is contrary to nature.

BLEEDING IN EVERY FORM IS WRONG. BLEEDING IN EVERY FORM IS WRONG.
All poisouous remedies, mineral and vegetable, that are used for the removal of discase, are wrong. They always leave an effect upon the system worse than the disease, and prostrate the powers of life.

All parts of the body are built up from the blood. The blood is the life, and if the blood is purified no disease can affect the system.

The most perfect remedy known to the world as a pu-rifier of the blood is the Vegeiable Universal Brandreth's Pills.

The interests of humanity demand that this theory of purgation should be promulgated to the world, and it has been, and shall be, one of the leading objects of my life to contribute to its investigation.

UNION OF SOUL AND BODY.

One of the most impenetrable secrets of the Almighty is the union of the soul and body.

But man knows that by acrimonious humors this union is dissolved, and death takes the place of life.

Experience has established beyond doubt that proper purgation reduces the total of acrimonious humors, and cures by perseverance, if the disease is curable, when Brandreth's Pills are the medicine used; which are in fact the only purgative medicine in the world which strengthers while it cleanses, being both tonic and purgative.

BRANDRETH'S PILLS.

BRANDERH'S PILLS.

AFPLICABLE IN ALL CASES, FROM DESEASE OF THE HEART TO A CHUSHUP TOR.

If any organ of the body is unbealthy, while it continues so impure blood will flow from it, and aggravate the already unbealthy condition of the part affected open the natural outlets. Brandreth's Pills will repair the difficulty, by purifying the blood. Use them daily in smaller or larger dozes as the necessity of the case call for. There will be no disappointment. A cure is insured, and sound health afterward.

The following setter relative to BRANDREIH'S PILLS demands attention from INVALIDS:-HAMMONTON, N. J., May 7, 1860. Dr. Branderri — Dear Sir—I have long wanted to write to you and express my gratitude for the benedicial effects that have been experienced in my own family, and in hundreds, aye, thousands of others, by the use of Brandreth's Pills. The first year my friend Brockway sold your pills in Boston, 1838, I was then in a declining state of health, and my friends as well as myself supposed that my earthly voyage would soon terminate. Mr. Brockway urged me to take the Brandreth Pills, but having used so much medicine with no good effect, I was more inclined to let nature take its course, and calmly submit to my fate. Mr. B. offered to give me one dozen boxes if I would take them as prescribed. By this I saw he had great faith in them, and I finally consented to take them, out not as a gift. I went home, and went at it most hopelessly. After taking one box I began to feel better. Well, sir, when I had used up my twelve boxes I was a well, healthy man—my weight having gone from 131 pounds up to 152 pounds. I then ordered a supply, and between that time and the present I retailed three thousand dollars worth of these invaluable Fills, and am quite sure that I have thereby been instrumental in saving, not hundreds, but thousands of lives. Yours, truly,

C. J. FAY, P. M.

PURE BLOOD GIVES LIFE AND THE BLOOMING

thereby been instrumental in saving, not hundreds, but thousands of lives. Yours, truly,

C. J. FSV, P. M.

PURE BLOOD GIVES LIFE AND THE BLOOMING COUNTENANCE.

Aerimonious humors are disease, and when in excess preduce that miserable sallowness of the complexion which indicates a remote condition from health.

THE PRINCIPLE OF DEATH

is corruptibility, which generates acrimonious humors, whose accumin ation in a butuan body are the occasion of every ache, of every pain, and of every form of disease. It is this principle which set bounds to the extent of our lives. While it is kept under we live, when it gains the ascendency we die. Such is the fate of man.

A MEDICINE, therefore, which will keep down this principle of death, will aid us to reach our full extent of life, and such is Brandreth's Filis, which are as harmless as bread, and act only upon and around partial pain, and where scrimonious humors have congregated, causing their removal by the organs of the stomach and bowels, thus aiding the life's principle by purifying it, which is the blood. For 109 years they have proved infallible correctors of disorders of the atomach, and bowels, curing costiveness and spasms, whether from wind or nervous excitability, loss of appetite, sick headache, dizaluess and swimming feeling in the head, accompanied with an unconquerable drowsmess, usually symptoms of apopicay or paralysis; queer, light, dragging feeling just above the disphram, generally must evident upon rising in the morning, and all the uniold, but felt symptoms of apopicay or paralysis; queer, light, dragging feeling just above the disphram, generally must evident upon rising in the morning, and all the uniold, but felt symptoms of the sum are generally allied with torphility or singgishness of the liver, caused by the presence upon that organ of an accumulation of acrimonious humors. These Brandreth's Pills remove, and at once its activity and healthy action is restored. Their use couringes us of their goodness: the stomach regains its power of health

VELLOW FEVER CURID.

How many lives could be saved were Brandreth's Pills adopted in this frightful malady? This great medicine, middly, but surely removes all poisons from the human system. Those who desire to carry with them a life insurance, should not full to procure a box. The colds, headaches and bowel affections at this season, are immediately cared by this innocent vegetable remedy.

The following case is that of a captain in the Spanish Army.— Army :-- ONE HOLD DEEDE'S PILLS CURES A SEVERE ATTACK OF

ONE HOX OF BRANDING IN STILLS CORRES A SEVERE ATTACK OF THELOW SEVER.

This 25th of December, 1839, I was attacked with yellow fever at Havana, on the 6th of January, 1856, accompanied with a most terrible pain of the head and back; I had one bex of Brandreth's Fills in my persession, which I used in doses of seven pills each day, and when the box was finished I found myself entirely recovered. Signed, Abaldo Segondo Angel Pasaron, of Havana, Cuba; now staying at 650 Housion street, New York, European Hotel.

Hotel.

YELLOW FEVER CURED WITH BRANGRETH'S PILIS

Mr. Arnold, who last August boarded with Mrs. Jane
Ward, near the corner of Tchoupitoulas and dired streets,
was attacked with yellow fever, and immediately swallowed direce pilis, and then took ten pile every hour for
seven hours afterwards. During the seven hours they
appeared to produce no effect, but at the end of that turns
a tecling of faintness came over him, and he thought the
last hour of his existence was at hand. He then blamed
himself for putting faith in Brandreth's Pilis. He told his
nurse if he was delirious, to continue to give more, as he
had begun he made up his mind to continue them, even in
the state he was. Scarcely had he given these orders
when he raised his hand to his face, and to use his own
expression, there were upon it drops of precentation as
large as book shot. He found that he had braken out into
the most profuse perspiration. Almost immediately the

BRANDRETH'S PILLS.

pills began to take effect, and he describes the evacuations as of the most dreadful kind, black and putrid to suffocation. The doors and windows were obliged to be thrown open. He was out of danger within twenty four hours of the commencement of the attack, and by taking fifteen pills "light and morning, on the fourth day he was out, and in the new commencement of the attack, and by taking fifteen pills "light and morning, on the fourth day he was out, and in the new commencement of the above method adopted at the commencement. Dr. Franklin never spoke more truly than when he said "a stitch in time," &c.

Would the people were wise—time may convince. All fevers are coossioned by the disordered motion of the blood, produced by the humoral serceity hardening the valves of the vessels. The blood circulates with greatly increased velocity, and is still increased by the friction of the globules, or particles which compose the mass of fluids. Then it is that the excessive heat is experienced throughout the whole system; and accompanied with great thirst, pains in the head, back, kidneys, and in fact a complete prostration of all the faculties of the mind as well as body.

Bleeding, calomel and barks are the usual remedies employed by physicians. What is the consequence? Two thirds die, and the other third recover from the fever—but with their blood overcharged with the very remedies themselves which have been swallowed to dispel the fever. These are generally deposited in the cavities of the yells and arteries, producing most horrid pains—especially in the night, when the cured patient is warm in bed—often obliging him to rise and apply cold water or some other cold application to ease the excessive pain; oftentimes coughs, most obstinate ones, dropsy, communition, by the remedies obstructing the lungs, and other debilitating affections lead the poor patient to the tomb after iong and cruel suffering.

This may be prevented if purgation is at once resorted to—and after the patient is reduced ever so low there is hop

I have a thousand cases, equal to the following, of cures of asthma in New York and the adjoining cities. Personal reference given to those who may wish to see the persons cured.

ASTHMA CURED BY DR. BRANDRETH'S PILLS.
The following core of asthma by the use of Dr. Benj. Brandreth's Pills is authenticated by seventeen well known respectable citizens of Greenwich, Coun.:—
This will certify that Thomas S. Brown, who had been for some time previous much affected with asthmatical symptoms, was taken suidenly worse on the 12th of June last. He began to cough and raise phlegm, and in the course of twenty four bours expectorated nearly two quarts of thick white jelly looking matter. Three physicians pronounced it a nervous humid spasmodic asthma; and after prescribing for some time, to no effect, the three consuited together, and finally declared they could do him no good—it would and must result in consumption, and death would ensue, and that in a very short time. The pain was excessive in all parts of his body; and the difficulty of breathing was such as almost to cause strangulation. He was reduced to a mere skeleton, and finally gave himself up to death. After being in this miserable state nearly two months, he saw an advertisement of Dr. Brandreth's Vegetable Universal Pills, and immediately sent by Capt. J. Waring, of Greenwich, for a 25 cent box, and found relief in the course of a few days. It is proper to say that he commenced with two pills at night and two its the morning; he found relief the second day; and encouraged thus to persevere with larger doses, he was soon able to sleep comfortably; and now, having taken them for about four months, according to the directions, is entirely recovered, and so far as we can judge, entirely in consequence of taking the above pills, which we have also used in our familles, and have found them invaluable.

James R. Mean, Daniel S. Betts, Hannah Hitchoock, John R. Beynolis, Abel Palmer, Rev. R. Palmer, P. V. T. Jessup, Stephen Waring, Augustus Lyon, John Limpry.

Fever and Acue, and all fevers whatsoever, are cured by perseverance with

FEVER AND ACUE, and all fevers whatsoever, are cured by perseverance with BRANDRETH'S PHLS, which takes all poisons, of whatever nature they may be from the circulation.

which takes all poisons, of whatever nature they may be, from the circulation.

FEVER AND AGUE CURED.

Mr. John Y. Haight, Supervisor of New Castle, West-cheeter county, New York, desires the attention of those interested. He says, November, 1858.—"I was, about two years ago, attacked with fever and ague, which, not withstanding the best medical advice, continued to sorely afflict me for six tedious months; I became yellow as saffron, and reduced to skin and bone. Medicine and physicians were abandoned in despair. As an experiment, I concluded to try a single dose of six of Brandreth's Universal Vegetable Pills, on an empty stomach, early in the morning. The first dose seemed to arouse all the latent emergics of my exhausted frame. I feared the worst—their purgative cifect was different from anything I had ever used or beard of. At length this effect ceased, and I seemed lighter and breathed freer. That evening I was indeed sensibly better and slept soundly all night. The next day I followed the same source and took the same number of pills. I continued to take the pills in this way about three weeks, when I found myself entirely cured. It was two years ago, and I have had no return. My health has been sarprisingly good, and I have used no medicine since. I have made this statement in accordance with what I conceive to be my duty."

THE REMITTENT FEVEL OF THE ISLAND OF ST. THOMAS CURED BY BRANDERTH'S PILLS.

New York, May 21, 1856.

Dr. EENJ, BRANDERTH.—

DRAN SUS--It seems to me to be a duty to say that when I was furthed States Consul at St. Thomas, in 1849, I used your pills with very great advantage. I was taken with the fever peculiar to that island; the doctor bled me, and I was first the tree peculiar to that island; the doctor bled me, and I went your pills. I at one took eight. Their effect was surprising. They seemed to be actuated by intelligence. I could feel them starching all round my stomach, even

really very feeble. In this condition I was recommended to one your pills. I at once took eight. Their effect was surprising. They seemed to be actuated by intelligence. I could feel them storching all round my stomach, even up to my throat, every recess of the body was aroused to action. I continued to use them daily until I had taken two boxes, containing twenty-five pills each, when I was quite restored to my usual health.

Governor Cxholm expressed to me the opinion that the Brandreth pills were the best medicine he had ever known; that he entirely relied on them when he or his family were sick. He would not be without them for any money, that he believed you had been the means, by introducing them, of saving many valuable lives—a sentiment in which I concur most cordially. I desire, my dear doctor, if you deem the above of any service, you will not be afraid to publish it. I am very truly, your friend.

CHARLES H. DELAVAN, late United States Consul for the Island of St. Thomas, West indies.

DVSPEPSIA CURED.

Description of the state of the same complaint of the state of the sta

will be of any use to you. I am, dear sir, truly yours, J. COOK, Publisher of the State Banner.

COSTIVENESS AND CHOLERA CURED.

Browners, Kings County, L. I., March I. Isao.

Rear — This is to certify that I was taken ill during the season of the cholera, in the year 1832, and continued thus until the spring of 1842, during which time I was severely froubled with dyspepsia and all its various train of suffering. I became extremely emacated, melancholy and worn out with suffering, so that life itself seemes, burthensome. I in the meantime applied to a number of the best physicians, who prescribed for me, and many were the bitter doses of medicine that I took, but without avail. At last I yielded to despair. The idea of taking the prescriptions of the physicians any longer was useless, and I was utterly opposed to taking pills. My friends became alarmed: often solicited me to try Brandreth's Fills, asserting that they had derived great benefits from their use. At last I was tempted to give them a trial, and it is but just to say that, after using them a short time. I began to recover, and soon was entirely restored to health; and I think it a duty I owe to the world and to Dr. Brandreth prostored to health; and I think it a duty I owe to the world and to Dr. Brandreth prostored to health; and I think it a duty I owe to the world and to Dr. Brandreth prostored, and I suffered with great contiveness, attended with dizniess and severe pain in the head and side and oppression of the heart. I was stended by several physicians of thicky for three years without obtaining relief, and had despaired of a cure till finally I was induced to try your Pills, which simest instantly relieved me, and in a short time completely restored my health. I consider them the best medicine in the world.

HEAR WHAT MIRS BURDENES, STATES DECEMBER 20, ISSO.

HEAR WHAT MES BURROUGHS, OF 240 ADAMS STUBER, BROOKLYN, STATES DECEMBER 20, 1850. I have used no other medicine than Brandreth's Pulls for the last twenty years. I have administered them with invariable success in typhus and scarlet fevers, amaltpox, hopping couch, measies, worms, to in like previous to and numediately after configement. With a mox or two of Brandreth's Pills in the bouse, happen what

BRANDRETH'S PILLS. may, I would not care whether the doctor lived next doctor twenty miles off.

RUPTURE CURED.

READ WHAT A SINGLE DOSE DID.

Mr. James Stillman, editor and proprietor of the West-chester County Journal, says, December 13, 1859.—About two years ago I ruptured myself, and have worn a trush ever since. In the beginning of last month I was taken with a slight pain in the upper orifice of the rapture. The pain gradually increased till on the third day I could not stand at all, nor could I and any position in bed to give me the least case. The symptoms were altogether those of strangulated hernia. I thought your Pills might afford me some little relief, and took three of the vegetable Universals. They operated in about four hours, immediately after which all pain cassed, and I have been able ever since to attend to my business without the slightest interruption.

BRANDRETH'S PILLS add the motive power to elementary matter, assist nature, by which all impurities are taken out of the blood. The man or woman who uses them is known by the clearness of his or her complexion and the healthfulness of their constitutions.

man or woman who uses them is known by the clearness of his or her complexion and the healthfulness of their constitutions.

While Brandreth's Pills carry out a universal principle of nature; they are the best anti-billous and aperient pill known. These pills, if taken so as to purge freely, will surely cure any curable disease. There is no form or kind of sickness that it does not exert a curative influence upon. Thus, by their power in resisting pairefaction, they cure measles, smallpox, worms and all contagious fevers. There is not a medicine in the world so able to purify the mass of blood and restore it to a healthy condition as the Brandreth Pills, except it be the Life Addition, which are a concentration of their valuable properties. This makes them so valuable in curing all kinds of chronic diseases, as crysipelas, sail rheum, scaid head, white swellings, sore eyes, and recent or chronic enlargement of the glands or otherwise. Perhaps the Brandreth Pills are one of the most powerful remedies in nature for the cure of rheumatism and old diseases of the skin and bones; for they open and penetrate into the most inmost recesses of the body, and drive out all malignant humors. They dissolve coagulated blood and cure inflammations of all kinds, whether of the bowels, of the lungs, or of other parts of the body. Their power is so great over the brain and nerves that paisies, convulsions (both in the mother and child) and insanity are cured by them. In fact, let any one suffering from sickness use them and be cured. They are a medicine which has to be used to be appreciated. By their use alone all chronic diseases could be soon banished from among us. Those whose prejudices will permit them will find the Brandreth Pills a great bleesing to them and their families. They should be in every house. They may be justly termed the safety valve of disease.

STRONG EVIDENCE.

STRONG EVIDENCE.

BURLINGTON, April 3, 1856.

DR. BRANDERFH:—

Sin.—From my carliest childhood I was subject to bleeding at the nose, dizziness, singing in my cars, and a heavy dull feeling in my head. Being of a strong, robust habit, the physicians said I had too much blood—that it was too rich also. At the age of twenty, five the bleeding from my nose not being so frequent as before, they thought it necessary to employ bleeding with the lancot and leachest omy nock, against the dreadful headaches from which I suffered. It seemed to give me great relief; but in a week to two the same course had to be again practiced. In one year I was bled twenty-three times, and had not less than two hundred leeches applied to my neck and back. I was put upon the use of baths, and a long course of saline medicines was prescribed. This course was purmed for several years, which was doing all the doctors could do to break down an original fine constitution. It is now about four years since I commenced to feel acute pains in my chest, head, limbs, joints, between the shoulders, along the spine, and in the throat. During all this season of sickness my bowels were either bound or in a state of looseness—costiveness generally prevailing. General oppression and sicepiessness came on. I lost my appetite entirely, and began to spit blood. The doctors seemed to do me no good, and worn out with their treatment, I determined in November last to commence with your pills. I commenced with four pills, and continued to take them daily for nearly two months, going up as high as tweive pills, and as low as one. I also several times took the boneset, as prescribed by Dr. Jance Lull, in his sixteen years' experience with your pills. After the first fifteen doese the spitting of bleed ceased entirely, the pains in my bead, joints and chest left me, and my appetite and sleep were in two months cattrily restored. In fact, I now feel like a new creature.

With reference to the above, apply to D. D. Howard, late of the Irving House, New York, now of

BLINDNESS, DEAFNESS, CHOLERA, FROM BAD BLOOD.
Dr. Frerick's (British and Foreign Medical Review)
says:—"The contamination of the blood by the excrementitions constituents of the urne produce amourcets,
(loss of vision), deafness, symptoms similar to typhus
fever." According to Dr. Frericks, "the rice discharge
in cholera is owing to enlargement of the capillaries, occasioned by alterations in the composition of the blood."
Brandreth's Pills by purifying the blood, has restored
sight to those who have been blind for years. Refer to
lir. Tousey of Tousey & Ross, Publishers, New York.

When issuitude and weariness, when chilly fits and listlessness of everything around, when faintness, giddiness,
flushing of the face, reduces of the eyes, pains in the eye
halls and lower part of the forchead, when with these we
have pain in the back, debility and sighing, there must
be no time lost. If these be not the symptoms of yellow
fever, they nevertheless admonish us that we are about
to be alarmingly sick, and a dose of six or eight Brandreth's Pills cannot be too soon swallowed. Two or three
such doses and plenty of Indian meal gruel for a day or
two will entirely cure. The evacuations will prove the
propriety of this course. In all cases the Brandreth Pills
purify and invigerate the blood, and should be always resorted to by those of a costive habit, and especially when
the above symptoms are present.

OCCASIONALLY PURGE AT THIS SEASON. GCCASIONALLY PURGE AT THIS SEASON.

Brandreth's Vegetable Pills are in a possiliar manner suitable to this climate. Their prompt application clears the intestinal canal of those obstructions, the occasion of contiveness, colics, cholers morbus, and other alarming symptoms usually occurring during our summer months, and always mere or less experienced under the heat of a tropical sun. The effects of these Pills are always salutary—often of the saving. No one ought to travel without to be ready in case of sudden attack of sickness. They are invariably compounded under the eye of Dr. Brandreth; no boys or inexperienced persons are employed—no mistakes can occur. In this particular how greatly they have the advantage over the best prescriptions carelessly compounded, and too often, when correctly read, made up from inferior drugs.

Brandreth's Pills are equally safe for the aged and for the young—for the mother when unraing and for the babe. They cannot injure and must benefit if medicine is needed.

MEN WISER NOW THAN FORMERLY.

While the blood is the seat of life, it is also the seat of

MEN WISER NOW THAN FORMERLY.

While the blood is the seat of life, it is also the seat of disease. For food gives the body strength; Brandreth's Pulls give blood the necessary power to throw out from itself all importises, thus rendering the stream of life pure and healthy. If men were more succere, there would be fewer religious creeds; and if they kept closer to nature's laws in the management of their busies, they would require little medicine. As men grow more intelligent they will become where and happier; even now their wisdom is proved by the fact that when sickness asmalls them they use Brandreth's Vegetable Universal Pills, which soon restore them to health.

The following is from the well known china and glass dealer now of Philadelphia — Naw Yons, Feb. 2, 1855. NEW YORK, Feb. 2, 1555.

dealer now of Philadelphia.—

New York, Feb. 2, 1855.

Dr. B. Branderii:—

From the great use of tobacco I became so debilitated about eight years ago, that my physicians considered it impossible for me to recover. I was worn down to skin and bones, was attlicted with chronic dyspepsis, and everything I ate disagreed with me. I had constant pain in my cheet, my bowels were costive, and seldem moved without recourse to melicine, which debilitated me more and more. In this condition I was recommended to use your "Vegetable Universal Pills." I did so, and gradually became restored to excellent health through their use. They mildly, yet energetically purged, and after each portion I seemed to be endowed with new life. My original robust health was soon restored, and I thank Ged, I am now a vigorous man of fifty six. But for your pills I verily believe I should be now in my grave. I shall be pleased to see any one at my store, and will state further particulars. I am, very respectfully, your obedient servant.

313 Broadway, above Kieventh street, or at the Irving House, New York.

House, New York.

THE CONSTITUTION

WHAT IS THAT WE CALL THE CONSTITUTION?
The bones, muscless, cartilages, nerves, skin and fluids, compose man's body. The blood makes or constitutes all these, and is, therefore, the Constitution.

THE HEART,
being first formed by the power it receives from its parent,
THE BLOOD,
builds up the whole body. When this blood is good it makes good blie, good chyle, good hair, good body, in fact, when the blood is impure it must be purified, and to do this
PUNCE OUT THE OLD LEVEN THAT YE MAY BECOME
A NEW LLIMP.

a figure applied spiritually, it is true, but how could it have any application unless confirmed by practical experience in the body of matter? The foundation upon which the figure of Scripture rests is and immovable as the laws which govern the tisies, or that occasion the thunders of heaven.

thunder of heaven.

THE CONDITION.

The condition upon which God gives beaith to man is a constant care to be temperate in all things, and to keep his stomach and bowels free from all morbid or unhealthy accumulations. I'se then those remedies which cleaned the bowels and purify the blood, which give the mind as well as the body states.

DR. B. BRANDRETH'S

VEGETARILE UNIVERSAL PILIS

Are those remedies, and

TIME HAS PROVED THEM THE NATURAL MEDICINE OF By their use we can re make ourselves in half the time it takes in the ordinary course of nature. Put on, then, a new body.
